

Lydia Pedersen

Content Engineer Portfolio

<https://lyd1acla1r3.github.io>

My complete portfolio is deployed as an interactive site demonstrating my documentation engineering work and technical communication philosophy. Please visit the link above to view:

The Transformer Architecture Ebook

A 24-chapter series breaking down the entire forward and backward pass using tensor notation, from token embeddings through backpropagation.

AI Pipeline Case Studies

Architectural overviews of the multi-stage writer agent and analytics deflection engine mentioned in my cover letter.

SERP API Benchmark

A data-driven empirical investigation into extraction fidelity for major SERP APIs against Google's AI Overviews.

Writing Samples

10 curated, downloadable PDFs spanning API management, Kubernetes, and event-driven architectures.
